DIY COIL INFORMATION & PRICING

DIY COIL & ROCKET STOVE

There's something special about creating your own wood-fired hot tub. Over the years, we've had countless requests for our heating coils - and now, we're making them available to you. Whether you're planning your own DIY hot tub project or looking to upgrade an existing setup, our handcrafted wood-fired heating coils are the perfect place to begin.

304 Stainless Steel DIY Heating Coil	R 7 900
316 Stainless Steel DIY Heating Coil	R 8 900
Rocket Stove	R 8 500

As we make these coils specifically for our hot tub design, please take note of the following:

- The coil can be used without the rocket stove for that open wood fire experience.
- We recommend that the coil be used to heat up a maximum of 1000 litres.
- The coil's and the rocket stove's are a DIY installation. It will require customisation in order to connect your coil.
- No returns policy for these items when purchased for your own DIY projects.
- The coils are supplied with an offset universal joint and two flat stainless steel mounting rings.
- No customisation on these items will be done by Buitengewoon.

DIY HEATING COIL

Pipe diameter
31.75mm x 1.5mm
