

DIY INTERNAL STOVE

We know very well that making a wood-fired hot tub is a lot of fun. We have had so many requests to sell our stoves separately that we have decided to. Doing your own DIY hot tub project? Buy one of our DIY wood-fired Hot Tub stoves for your project. The stove includes 1 length chimney pipe, chimney heat shield and cowl.

Stainless steel DIY stove R 25 900 (incl VAT)

As we make these stoves specifically for our hot tub design, please take note of the following:

- The stove's are a DIY installation. It will require customisation in order to connect these to your DIY projects.
- No customisation on these items will be done by Buitengewoon.
- No returns policy for these items when purchased for your own DIY projects.
- We recommend that the stove be used to heat up a maximum of 1000 litres.
- The stove is manufactured from marine grade 316 stainless steel.
- Please take note of the sizing of the stove unit when planning to ensure it fits into your DIY project.
